

740-52 Door Hinge Bolts Fitting Instructions

Installing Door Hinge Bolts

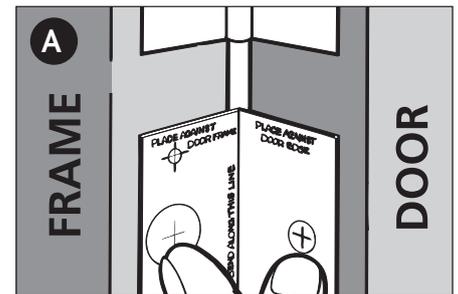

To fit a Door Hinge Bolt you will require the following tools:

- Tape Measure
- Bradawl
- Drill
- 9.5mm & 22mm drill bits
- Screwdriver
- Pencil

- A** Fit Hinge bolts 75mm below the top hinge and 75mm above bottom hinge.
- B** Cut out template enclosed. With door open, position template into right angle corner of door edge and door frame. Ensure templates sides are flat against both. When using template on doors where hinges are on the right side as you face the door, pierce template hole centres. Offer template (top uppermost), with the front of the pack facing you. Use bradawl to mark the position of the bolt and screw holes as shown on the template.
- C** Drill holes in frame and door to sizes shown on template. Door may require removal for drilling. Screw receiving plates onto door frame (recess if necessary). Tap bolt into door.

Additional Information

Maintenance - Use a moist cloth only to clean all types of finish, household abrasives or solvents may affect the surface finish.

Fitting template enclosed.
